# OEE explorer

Transforming Vorne Data into Actionable Insights for Optimal Decisions

Visualize and Optimize Your Operations with Effortless Ease

Unleashing Manufacturing Potential. Designed to optimize your production landscape by providing comprehensive insights into Overall Equipment Effectiveness (OEE). With built-in dashboards that display critical metrics like OEE, TEEP, Availability, Performance, and Quality, our solution empowers you to make informed decisions that drive manufacturing success. Track everything from reason codes to reject reasons, down time, and more, all from one centralized platform.

Empowered Productivity Analytics. OEE Explorer not only equips you with essential metrics but also enables you to define your own fields and calculations. This customization enhances your analytical capabilities, allowing you to better understand efficiency and productivity. Utilize historical data to predict and improve future performance, turning insights into tangible enhancements across your manufacturing operations.

Key Features

Fully Customized Dashboards. Pre-built dashboards tailored to Vorne's V2 board structure for instant insights.

Rich Visualization Options. Over 40 visualization types available to display and analyze complex data.

**Drag-and-Drop Interface.** Easily customize and build charts with an intuitive, no-code interface.

Flexible Deployment. Choose between on-premises or cloud installation for optimal flexibility.

Customizable Security Options. Support for both secured and open deployments based on your needs.

Fast and Responsive. Quickly load charts and dashboards for immediate data access and analysis.

Comprehensive Support. Benefit from thorough documentation and the OEE IntelliSuite support team.

Coming soon... Cost of Production. We are working on a tool to import your production costs so you can see costs of rejects, slow running, down time, overtime labor, and opportunity costs.

Part of ◔ EE intellisuite

Your Partner in Data-Driven Performance and Productivity

Easy Integrations

Integrate With Any Database. Bring in data from any sql database. Easily integrate Vorne data with ERP, CRM, CMMS, and many other systems.

Fueled by Vorne. We are solely focused on extending and enhancing the capability and value of the industry leading technology of Vorne Industries

Track Employee Logins with OEE Work Tracker. Use our OEE Work Tracker software to tie Vorne analytics to individual employees - both primary, secondary, and techs

Bring Your V1 Data With You. Use our OEE Record Converter tool to transform your V1 dataset into the V2 data schema viewable with OEE Explorer

Part of the Vetii Group - Makers of the XL Bolt On Data Collector. Simple and easy to use tool that collects and aggregate all your XL device data

Seamless Integration for Enhanced Decision-Making

Versatile Deployment Options. OEE Explorer adapts to your infrastructure needs, offering both on-premises and cloud deployment. Whether you seek the security of on-site installation or the flexibility of cloud-based solutions, we cater to your preferences to ensure seamless integration with your existing data systems. This flexibility provides you with the control necessary to meet diverse operational demands.

Dedicated Support and Resources. The OEE IntelliSuite support team provides dedicated assistance and thorough documentation to ensure you get the most from your implementation. Our experts are ready to help you customize reports, troubleshoot issues, and optimize your dashboards to meet your specific manufacturing needs. Our solution seamlessly integrates with major database systems, allowing you to connect data from multiple sources.
